Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

In the act of stepping out of the boat, Nelson received a shot through the right elbow, and fell; but, as he fell, he caught the sword which he had just drawn, in his left hand, determined never to part with it while he lived, for it had belonged to his uncle. Captain Suckling and he valued it like a relic. Nisbet, who was close to him, placed him in the bottom of the boat, and laid his hat over the shattered arm, lest the sight of the blood, which gushed out in great abundance, should increase his faintness. He then examined the wound, and, taking some silk handkerchiefs from his neck, bound them round the lacerated vessels. Had it not been for this presence of mind in his stepson, Nelson must have perished. One of his bargemen, by name Lovel, tore his shirt into shreds, and made a sling with them for the broken limb. They then collected five other seamen, by whose assistance they succeeded at length in getting the boat afloat, for it had grounded with the falling tide. Nisbet took one of the oars and ordered the steersman to go close under the guns of the battery, that they might be safe from its tremendous fire. Hearing his voice, Nelson roused himself, and desired to be lifted up in the boat, that might look about him.

Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

A horde of displaced persons on the move throughout the summer months is one of the problems of our age. What is the meaning of this yearly migration? Why do hundreds of thousands of human beings feel impelled to leave comfortable homes for the certain misery of the voyage and the uncertain amenities of the arrival, not to speak of danger to life and limb? Americans see typhoid germs wickedly lurking in every drop of European water and regard Europe as a dreaded smallpox area. There are the hazards of ship, aeroplane, and motor coach. The last named has a way of taking to the air from mountain roads and of pulverized at level crossings so that neither hill nor plain can be considered perfectly safe. All tourists half expect to be murdered. So brave and energetic of them to tour. Why do they do it? The answer is that the modern dwelling is comfortable, convenient lean, but it is not a home. Now that people live on shelves, perched between earth and sky, with nowhere to sit out of doors, no garden here they can plant a flower or pick an herb, they are driven on to the Lead for their holidays. All human beings need some aesthetic nourishment, and the inhabitants of ugly towns form the bulk of the tourist trade. A search for beauty, known as sight-seeing, is common to all tourists.

Case Sensitivity: No

Answer :

Possible Answer: NA

Given Every year, hordes of people throughout the world leave their homes in search of

- a. Global Warming
- b. The Importance of Education
- c. The Role of a Soldier in the Defence of India
- d. The Joys of Summer Vacation

Case Sensitivity: No

Answer :

Possible Answer: NA

Given **Topic- Global Warming** The harmful rays from the Sun causes skin cancer and various harmful side effects. The Ozone layer above the atmosphere protects us against these harmful radiations. But, due to overexploitation of resources, excessive emissions of harmful gases from various vehicles and all the man made changes happening in the nature does not allow the sun rays, once trapped inside the earth's surface, to go back thus, making the earth's atmosphere so hot, which is termed as Global Warming. This issue leads to melting of Glaciers and increase in the temperature of atmosphere. Today, is the need of the hour, that we as individual citizens should take a step towards prevention of Global Warming. Various harmful gases like Nitrogen Oxide, Sulphur Dioxide, Carbon Dioxide, Methane etc, are the roots that cause Gobal Warming. A man in present century, cannot live without air conditioners, big polluting vehicles and disturbing the natural cycle of nature, which all leads to Global Warming. To solve this global issue, government has taken many steps to reduce Global Warming like G-7 summit of which India is a part, has planned to reduce the emissions of such gases by 2025. Also, the concept of "ODD-EVEN RULE" of vehicles is there in order to reduce the emissions of harmful gases. Nowadays, air conditioners with advanced techonolgy are available in order to reduce Global Warming. At an individual level, we should not waste the resources unnecessary and follow the concept of sustainable development. These small steps would one day lead to a bigger change, hence, making India free from Global Warming.

Given 3040 Lic Colony Chandigarh 3 October 2022 Dear Sushmita I hope you are in pink of
Answer : your health. I am afraid to know that you have not fared well in your recent examinations. I am writing this letter to discuss some pieces of advice with you. Examinations are a part of life and failures are the pillars of success. You should not take the marks of examination to your heart, instead you should work more hard and focus more on your weaknesses. The school examinations are not your real life tests. Some of the points for improvements that I would like to share with you are that the subject, you find difficult, practice it daily and revise thoroughly before your exam. You should try to solve previous year question papers too, in order to get an idea of the pattern and how questions come in exam. You should also, discuss your doubts with your teacher on a regular basis and don't feel shy while clearing your concepts and doubts. You may also take the help of youtube videos for better understanding of the topics. Make a habit of writing notes on a regular basis of whatever you study, this will not make you panic at the end moment while revising. Give my regards to uncle and aunt. I would be waiting for your response. Your Loving Indejot

Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

Science is helping man to produce much more food from the earth. By this, it is helping to get rid of famine and to prevent sickness caused by not having enough food to eat. It has also made possible the sending of quick relief to places where there is shortage of food and medicines with the help of motor lorries, railway trains, ships and airplanes. That is also very good, and many lives are saved in such way. There are also many discoveries of science which have definitely brought unhappiness into the world. But that is not because the discoveries are bad, but because men are using them badly. For example, consider the discovery of gun powder and of other explosives each more powerful than the previous one discovered. In ancient times men could wound and kill each other only if they were near enough to strike each other with stones, arrows, spears or swords. Even in battles the arms on both sides usually consisted of a few thousand men so the number wounded and killed was not very large. In most wars the peasants went on cultivating their fields peacefully even when the armies were fighting a few kilometers away. But the invention of firearms and high explosives caused a great change. A modern machine-gun or quick firing gun, worked by a single man, can wound, and kill hundreds of people in a few minutes. One modern bomb can kill hundreds of thousands of people immediately if it is dropped on a big city. The scientists who invented these terrible weapons are not wicked men who enjoy killing. They are people with kind hearts, but they are cleverer, and they earn their living by discovering new things. It is the leaders of the various nations who employ them to make discoveries which can be used to kill the people of other nations. The same discoveries could be used for useful purposes if the leaders did not allow them to be used for killing. Explosives are not harmful they are used for such purposes as helping to get coal, metals and other materials out of the earth. The same motors and airplanes which are used to carry guns and drop bombs, can be very useful for good purposes. So, we see that it is not the discoveries and inventions than are bad but the ways in which men use them.

Case Sensitivity: No

Answer :

Possible Answer: NA

Given Title- Inventions or Discoveries are a Boon or Ban ! The fastest growing technology and advancements in science have led to many discoveries and inventions which either can be useful or desctructive for the economy. The major problems of India like hunger, poverty are being removed with new advancement in motor lorries, railways and ships. But, man being a social animal, his greed comes in between before achieving his goals. Earlier, when there was no such inventions of science, people used to live a simple life, leading to less loss of human life and less hatred. Now a days, a single bomb can cause massive destruction all because of new ways of inventing a single thing. Thus, it is in the hands of the man, whether to use these techonologies in an effective or destructive way. Like a coin having two sides, similarly, the discoveries and inventions have both effects.

Given **Pollution can be defined as the alteration or decrease in the quality of the**

Answer : environmental resources or ecosystem services provided by the nature. There are 4 main types of pollution, that are soil pollution, water pollution, air pollution and noise pollution. Soil pollution occurs mainly due to the household waste products such as empty packets, plastic bottles and plastic bags. They degrade the soil quality and causes soil erosion thus the fertility of soil is also reduced. Water pollution mainly occurs due to the industrial waste and harmful chemicals that are drawn into the rivers and lakes which results in water pollution. Air pollution mainly occurs due to the harmful gases that are released from factories and vehicles. it is the most severe pollution for the survival of living organisms as the amount of greenhouse gases such as carbon dioxide and methane is increasing in the atmosphere and oxygen is depleting thus air is getting polluted which results in problems related to breathing. These are threat to the survival of living beings. Noise pollution is a type of pollution which occurs due to the prolonged use of the loudspeakers and other instruments that produce sound. Noise pollution also occurs due to the loud horns of the vehicles. Continous exposure to loud sound can permanently cause hearing damage. Thus, pollution is a threat to life. We should take serious steps to reduce the pollution. Government should strictly enforce schemes such as plastic ban and increased use of electric vehicles so that we can save the mother earth.

Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

There is nothing which adds so much to the beauty of the countryside as water, be it just a little stream trickling over the rocks or a little pond by the wayside where the cattle quench their thirst of an evening. The rain-fed tanks that are so common in South India-alas often so sadly neglected in their maintenance are a cheering sight when they are full. They are, of course, shallow, but this is less evident since the water is silt-laden and throws the light back, and bottom does not therefore show up. These tanks play a vital role in South Indian agriculture. In Mysore, for example, much of the rice is grown under them. Some of these tanks are surprisingly large and it is a beautiful sight to see the sun rise or set over one of them. Water in a landscape may be compared to the eyes in a human face. It reflects the mood of the hour, being bright and gay when the sun shines, turning to dark and gloomy when the sky is overcast.

 Answer: reached finals after defeating 22 teams of other colleges in the district. On the contrary the team of Khalsa college Jalandhar was in finals against us. The final match was played in the ground of Doaba college. Chaudhary Karnail Singh was the referee for the match who is a well-known referee. He blew his whistle at 4 and both the teams came into the ground. We won the toss and took our places when the referee blew the whistle again. The game began in the wink of an eye. A huge crowd was there to see the match. The ground was jam-packed. Although all the players of our team play well but we were proud of the captain Jeet and right-in Charni. Our team stood stiff for 10 minutes but we were afraid that a goal may happen. Our goalkeeper was brilliant, he didn't let a single goal happen. He stopped every goal by catching the ball. Then a whistle was blown and half time was over so we all ran outside and met our principal.

- a. More Lessons are Learnt on the Sports Field than in the classroom
- b. Laughter is the Best Medicine
- c. The Advantages and Disadvantages of Competition.
- d. The Use of Polythene Bags should be Banned

Case Sensitivity: No

Answer :

Possible Answer: NA

Given d.The usage of polythene bags is such a serious problem now a days.As these are non biodegradable substances therefore cannot be decomposed easily.Polythene bags are very harmful for animals as well as human health.Polythene bags are consumed by animals with their food,Hence causes serious problems.During manufacturing of polythene bags ,toxic chemicals are released.Besides this,people throw polythene bags here and there.Hence,result into serious illness and clogged drainage system.Polythene bags are major source of soil and air pollution as they can't be decomposed.Hence lowers the fertility of soil.when these bags are burnt into air, results into air pollution.Highly toxic gases are released into the air.This is how it becomes the main source of air pollution.It's a serious problem that mankind is facing now a days.In conclusion,we can say that many activies are being started by government in order to lessen the usage of polythene bags.Being the civilsed citizen,we should also give our contribution in it and stop carrying polythene bags.

Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

Odisha, a small state in the east coast of India, was battered by Cyclone Phailin in the last weekend. The cyclone came from the Bay of Bengal. It was the result of a low-pressure area developing in the sea. From a location a few hundred kilometers off the coast, Cyclone Phailin gradually moved towards the land. The wind speed was nearly 220 kilometers per hour. The violent wind hit villages near the coastline with deadly force. Mud houses were flattened, trees uprooted, and power lines were reduced to tangled heaps of wire. Fortunately, weather radars tracked the Phailin doggedly as a result of which people were evacuated from their houses that fell in the projected path of Cyclone Phailin. Millions of people were quickly moved to temporary shelters with remarkable efficiency. This reduced the death toll to negligible numbers. It was a remarkable success of disaster management in India. In another operation, the Coast Guard spotted a cargo ship at night that had tilted dangerously in the waters a few kilometers off Bengal. Responding to its SOS call, the Coast Guard rushed to its rescue and lifted out the sailors who were floating on their lifeboat in the dark near their ship

Q.1 Write an essay of 150 words on any one of the following topics :

- a. Today's Youth is more Practical and Less Swayed by Emotions.
- b. Students should not be allowed to Play PUBG
- c. Save Fuel for Better Environment
- d. Safety of Women in India

Case Sensitivity: No

Answer :

Possible Answer: NA

Given **SAFETY OF WOMEN IN INDIA** India, world's largest democracy is a country of great freedom fighters and leaders. It is known for its bravery and humble nature. With time it has developed and equality is being practiced in it. But, the women of India are not safe. They are being assaulted and beaten at many places be it roads, cabs, matrimonial homes. They cannot walk freely at nights without the fear of being assaulted and raped. It is not just about nights they are also being assaulted in daylight at offices, buses, cabs, religious places etc. They are not able to enjoy their right to freedom properly because of some uncultural men. Women face discrimination in many ways. Married women are being beaten because of dowry, sometimes they are beaten to an extent that they die. Is money and things are more important than someone's life? Some are being raped by their husbands i.e. called marital rape. Even teenager females are being raped and killed. Nowadays, female child who are attending schools are being raped and assaulted, some of them are being assaulted by their teachers. Is this the society we want to live in? Female workers are being assaulted at offices or on the way at their home. There are such heinous crimes that one can't even imagine. Every year a number of females die because of sexual assault. But do they deserve it? No, they don't. We need to take strict action to stop this low lives men who commits these crimes and should protect our women. Govt. should make strict laws for punishments given to these offenders. Awareness should be provided so that they will fear to do something like this. Justice should not be delayed in these cases as they get another chance to assault the victim. The govt. should set an example to everyone by punishing the accused with a strict punishment so that no one will do anything like this in future. Also, the parents should teach their children to not do anything like that and also about the consequences of it. The parents of female child should teach them self-defence so they can protect themselves. By doing these we can stop heinous crimes from happening to some extent.

Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

Charity is a universal duty, which it is in every man's powers sometimes to practice, since every degree of assistance given to another on proper motives, is an act of charity; and there is scarcely any man in such a state of weakness that he may not on some occasion benefit his neighbor. He that cannot relieve the poor may instruct the ignorant, and he that cannot attend the sick may reclaim the vicious. He that can give little assistance himself may yet perform the duty of charity by inflaming the ardor of others and recommending the petitions which he cannot grant, to those who have more power to bestow. The widow that shall give her mite to the treasury, and the poor man who shall bring to the thirsty a cup of cold water, shall not lose their reward.

Case Sensitivity: No

Answer :

Possible Answer: NA

Given Charity is a universal duty, one can perform it by giving assistance to others. There is hardly any man who is not able to provide help to anyone in any manner. He should give assistance by helping or giving petitions to others so that they can help. The person who should be rewarded should not be exempted from their rewards.

Given **Education is a light and illiteracy is a darkness. In darkness no one can reach**
 Answer: **success either man or woman. In our nation there is a great push on education. But, there are no steps taken towards woman's education. This is the reason why our nation is that behind in development. Females comprises half part of our society. If we educate one male then only one male becomes educated, but if we educate one female then whole family becomes educated. If a man is educated and woman is uneducated then their thoughts never meet. Because of that there will be no happiness in the house and the two veheeler car will start to lose its balance. Because of illiteracy she will not be able to spend the husband's salaray in a wise manner. If a woman is educated then she will spend on necessary expenditures and will ignore the unnecessary ones. Husband is the head of the family and wife is an advisor like a King and its minister. Only one educated woman can advise her husband according to time and situation. Among world's big and famous men most has success because of their mothers. One intelligent mother, from childhood strengthens the base of good deeds in her child that he comes out as a great man in the society.**

Q.1 Write an essay of 150 words on any one of the following topics:

- a. Boarding Schools are far Better than Day Schools for the All-Round Education of a Child.
- b. The use of Mobile Phones must be allowed in Schools."
- c. The Best Things in Life Come Free.
- d. A Trekking Expedition

Case Sensitivity: No

Answer :

Possible Answer: NA

Given Mobile phones play a significant role in the life of students or in the field of education Answer : also. There are many pros and cons of mobile phones which would be elucidated in the following paragraphs. To begin with, the mobile phones must be allowed in the school campus because in this modern era, education cannot be done without technology. However, teachers provide the best facility but sometimes students are not able to understand what the teacher taught. Moreover, students can attend online classes in the free lectures. To contrast with, mobile phones can be dangerous in the school because sometimes students indulge in bad situation and they spend a lot of time on mobile phones and neglect their study. In addition to it, some students shoot a video of others and post on social media. So, school's burden will be increased after allowing the phones to the students. To conclude, School should allow mobile phones because sometimes students come to school alone by walkin and it would be helpful in an emergency but not allow to use it in the campus, and submit phones in the office.

Give reasons for your request and explain in what way an extended break would make a difference to you as a student.

Case Sensitivity: No

Answer :

Possible Answer: NA

Given House Number 123 Abc Street Mno City October 05, 2022 Dear Bnm, I hope you are fine and you are doing well in your life. I had visited to Amritsar last week because a historical trip was organised by my school. I wanted to tell you all the things that I had seen there. I had visited to Jallianwala Bagh also. There was a great history behind it which was explained by my teacher. Many innocent people were killed on that place by General O'Dyer. Then we went to the Golden Temple, I felt very relaxed after listening to the gurbani. People come from different religions to seek the blessings of Guru's. So, I have gained the knowledge of Sikkism as well as I have learnt the lines of Japji Sahib Path also. I came to know about the massacre of 1884 in which Sikhs were killed by British army force on this holy place. This one day trip was really important for me because I have learnt that all are equal in the eyes of God. I will again plan this trip when you will visit to India and we both will go there. Hope you will come soon. Yours truly, OPQ

Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

Mankind in general is not sufficiently acquainted with the import of the word justice. It is commonly believed to consist only in a performance of those duties which the laws of society can oblige. This, I allow is sometimes the import of this word, and in this sense, justice is distinguished from equity. But there is justice still more extensive, and which can be shown to embrace all the virtues united. Justice may be defined to be that virtue that impels us to give to every person what is his due. In this extended sense of the word, it comprehends the practice of every virtue that reason prescribes or society should expect. Our duty to our maker, to each other, and to ourselves are fully answered if we give them what we owe them. Thus justice, properly speaking, is the only virtue, all the rest have their origin in it.

Case Sensitivity: No

Answer :

Possible Answer: NA

Given Mankind versus Justice Mankind belongs to that duties which are related to justice. But Justice is that virtue which can be expected by the society. What we give to others, it will same come back to us. Justice originates from one's own speaking.

Q.3 Write a precise of the following paragraph in not more than 1/3 number of words of the total passage.

We call anything beautiful that gives us pleasure, and that depends as much upon ourselves as upon what is outside us. Perhaps the majority of people find the sea beautiful when it is blue. If someone has lived in Italy as a child and has to live beside the grey northern seas when he is grown up, he will think that the grey seas are ugly: and that nothing can be so beautiful as the blue Mediterranean. But suppose a Scotsman who loves Scotland has to go and live in Italy. He might find the blue sea after a little while very uninteresting. Only when he went home and saw the grey sea again would he find the sea beautiful. We are made in different ways, and grey may be just as beautiful as blue, just as the cry of a baby may be found sweeter in someone's ears than the finest note of the finest singer that ever lived. Nothing is beautiful or ugly in itself but thinking makes it so.
