Comprehension:

Read the passage and answer the questions given below it.

Water scarcity is inextricably linked to human rights, and sufficient access to safe drinking water is a priority for global development. However, given the challenges of population growth, profligate use, growing pollution, and changes in weather patterns due to global warming, many countries and major cities worldwide, both wealthy and poor, faced increasing water scarcity in the 21st century.

There are two general types of water scarcity: physical and economic. Physical, or absolute, water scarcity is the result of a region's demand outpacing the limited water resources found there. According to the Food and Agricultural Organization (FAO) of the United Nations, around 1.2 billion people live in areas of physical scarcity; many of these people live in arid or

semi-arid regions. Physical water scarcity can be seasonal; an estimated two-thirds of the world's population lives in areas subject to seasonal water scarcity at least one month of the year. The number of people affected by physical water scarcity is expected to grow as populations increase and as weather patterns become more unpredictable and extreme. Economic water scarcity is due to a lack of water infrastructure in general or to the poor management of water resources where infrastructure is in place. The FAO estimates that more than 1.6 billion people face economic water shortage. In areas with economic water scarcity, there usually is sufficient water to meet human and environmental needs, but access is limited. Mismanagement or underdevelopment may mean that accessible water is polluted or unsanitary for human consumption. Economic water scarcity can also result from unregulated water use for agriculture or industry, often at the expense of the general population. Finally, major inefficiencies in water use, usually due to the economic undervaluing of water as a finite natural resource, can contribute to water scarcity. Often, economic water scarcity arises from multiple factors in combination. A classic example of this is Mexico City, home to more than 20 million people in its metropolitan area. Although the city receives abundant rainfall, averaging more than 700 mm (27.5 inches) annually, its centuries of urban development mean that most precipitation is lost as contaminated runoff in the sewer system. In addition, elimination of the wetlands and lakes that once surrounded the city means that very little of this precipitation feeds back into local aquifers.

Q.11 The writer states that the most significant reason for economic water scarcity is that:

- Ans
- ☒ 1. these areas are too densely- populated and the consumption is high
 - ☒ 2. people do not realize that water is a finite resource
 - ☒ 3. they have no rainfall and hence there is no ground water
 - ☒ 4. there is water pollution due to developing industries

Read the passage and answer the questions given below it.

When Sujan had made no progress even after three years, Haran the schoolteacher went to Dibakar's shop and told him, 'Not even the gods will be able to give your son an education. My suggestion is that you withdraw him from school. It's just bad luck—why else would your son have turned out this way? So many other boys are going to school and doing so well.' Dibakar had no choice but to call his son and ask, 'What have you learnt at the pathshala in all this time?'

'I've learnt the call of twenty-two different birds, Baba,' Sujan told him. 'There's a banyan tree behind our pathshala and all sorts of birds are to be found in it.'

'Do you want to be a mimic then—a harbola?'

'A harbola? What's that?'

'Harbolas can imitate the sounds of different birds and animals. They make a living by performing their mimicry for audiences. Since you've made no headway with studies, you won't be able to run the shop—you don't even know how to add numbers. You're of no use to me.'

So Sujan devoted himself to becoming a harbola. His favourite pastime was to wander about the fields and woods, listening closely to the cries of birds and beasts and imitating them. He never tired of this, for he was quite healthy and could walk long distances, climb trees and swim. When the birds responded to his cries by calling back, his heart danced in delight. All the birds seemed to be his friends. He had mastered the cries of cows and calves and sheep and goats too by listening to them closely in the fields. They too answered his cries when he imitated them. His mooing brought the old crone Nistarini out of her hut. Nistarini was under the impression that Dhabali's calf had returned unexpectedly. Moti the washerman's ass craned his neck and pricked up his ears, braying in response to Sujan's brays, wondering where this other donkey had arrived from. Sujan could also mimic the neighing of the horse; he emitted this call outside the Haldars', who were the zamindars' house. Hearing Sujan, Karim miyan, the groom asked himself, if that's not my horse, whose horse is it?

Comprehension:

निम्नलिखित गद्यांश को पढ़कर उसका सही उत्तर दीजिये।

किसी ने ठीक ही कहा है - यदि मनुष्य का धन नष्ट हो गया, तो कुछ नष्ट नहीं हुआ, यदि उसका स्वास्थ्य नष्ट हो गया, तो कुछ नष्ट हो गया, परंतु यदि उसका चरित्र नष्ट हो गया, तो समझिए नकसजज सबकुछ नष्ट हो गया। 'चरित्र' क्या है? यदि इस प्रश्न उत्तर खोजें तो हम पाएँगे कि चरित्र का संबंध व्यक्ति के आचरण, व्यवहार, चाल-चलन, कार्य-कलाप तथा गुण-दोषों से है। किसी ने सच कहा है - 'चरित्र आदतों का समूह है।' व्यक्ति की पहचान उसकी आदतों से की जा सकती है। चरित्र व्यक्ति का सबसे बड़ा धन है, उसकी कीर्ति का आधार है, उसकी उन्नति का सोपान है तथा जीवन के समस्त वैभवों, ऐशवर्यों, समृद्धि आदि की आधार शिला है। चरित्रवान व्यक्ति ही राष्ट्र शक्ति का मूलधार होते हैं। आज संसार में जो राष्ट्र इतने उन्नत, समृद्ध और विकसित हैं, उनके पीछे वहाँ के नागरिकों के चरित्र का बहुत बड़ा योगदान है। जापान का उदाहरण हमारे सामने है। छोटा-सा देश जापान, जो द्वितीय विश्व-युद्ध में ध्वस्त-सा हो गया था, अपने नागरिकों के चरित्र के कारण आज विश्व में पुनः प्रतिष्ठा पा गया है। दुर्भाग्य से आज हमारे देश में नैतिक मूल्यों की कमी के समय कैद कारण राष्ट्रीय चरित्र अभाव हो गया है। प्रत्येक नागरिक का कर्तव्य है कि वह चरित्र की ओर ध्यान दे।

निम्नलिखित गद्यांश को पढ़कर उसका सही उत्तर दीजिये।

मनुष्य अपने नैतिक गुणों से ही जीवधारियों में श्रेष्ठतम माना जाता है। हर व्यक्ति जीवनपर्यंत सुख में रहता है। तन के सुख मनुष्य और पशु-पक्षी को समान रूप से चाहिए, किंतु मन और आत्मा के सुख केवल मनुष्यों के लिए हैं। धरती के जितने भी सुख हैं उनमें सबसे बड़ा है 'परोपकार सुख'। किसी अंधे को सड़क पार कराना, किसी भूखे को अन्न खिलाना, किसी प्यासे की प्यास बुझाना, किसी रोते हुए को ढाँढस बँधाना, किसी निराश-हताश को आशान्वित करना तथा किसी लाचार, गरीब और ज़रूरतमंद के काम आने पर जो सुख मिलता है, उसकी किसी भी सुख या आनंद से तुलना नहीं की जा सकती। अपने लिए तो दुनिया में सभी प्राणी जीते हैं, पर जब हम अपना जीवन परोपकार में लगा देते हैं तो हमारा जीवन धन्य हो जाता है। सचमुच परोपकार से बड़ा कोई धर्म नहीं है।
