Comprehension:

Read the passage and answer the questions given below it.

Basanti Samant, 60, or Basanti behen, as she is widely addressed, belongs to Kausani, a village of around 2,400 people on the border of Bageshwar and Almora districts of Uttarakhand. Some years ago, she led a movement – forming 200 groups, each with 15-20 women – in and around Kausani, to save the Kosi. By 2002, the river's summer flow had dwindled to around 80 litres a second from 800 litres in 1992, and since then Samant and the women of Kausani have worked hard for its conservation.

Back in 2002, Samant inspired women to stop cutting live wood and start planting more native broadleaf trees such as the oak. The women pledged to use water judiciously, and to put out and prevent forest fires. Samant ushered them into a sisterhood that conserves the environment, but over the years, the women have stayed together, deriving strength from each other for battles also fought within their homes.

But, at first, Samant had to fight her own battle.

"My life was like the mountain – difficult and uphill," she says. When she was around 12 and had completed Class 5, Basanti was married. She moved to her husband's home in Tharkot village of Pithoragarh district. By the time she turned 15, her husband, a school teacher, died.

"My mother-in-law would tell me that I ate him," she says.

Soon returned home to Digara, her village in Pithoragarh, to help her mother and aunts cut grass and collect cow dung. Samant's father, who worked in the police department in Bihar, tried to get her re-admitted in school. "He wanted me to become a primary school teacher," she says. But there was strong opposition at home. "If I ever read a book, my mother would

taunt me, 'Will you start working in an office now?' I didn't have the courage to oppose her." A few years later, Basanti heard about Lakshmi Ashram, a training centre for young women in Kasauni, started in 1946 by Catherine Heilman, a disciple of Mahatma Gandhi. Basanti sent a letter to the ashram asking for admission. "Radha Bhatt, the president, asked me to come," she says. Her father dropped her to the ashram for a year-long sewing programme in 1980. Basanti extended her stay to fulfil her father's dream by teaching in Lakshmi Ashram's balwadis. She also filled out forms to resume schooling. "I graduated high school [Class 10, through a distance learning course] at the age of 31. My brother distributed sweets all over the village," she says, beaming at something that happened 30 years ago as if it happened yesterday.

Read the passage and answer the questions given below it.

"Write about things as if you are looking at them for the last time and you will find the words to preserve them." Says Ruskin Bond. Surrounded by trees, insects, birds and the changing seasons in his beloved Mussoorie, Bond says, the natural world started seeping into his stories and taking part... the bird on the wing, the sunflower in sunshine, the fox who commands the night, all these little things are part of his writing. "People say my writing style is simple, I'd say it's an art to convey complex ideas simply. Words are wonderful things and

you must respect the language you write in. Don't be lazy with grammar and composition. When words ring true, you get your greatest satisfaction as a writer. If you don't find joy in that, give up writing," he adds

"Reading is all important if you want to write. Start by reading the works of someone you want to emulate," says Bond. "Study their style... an experienced reader can tell if a passage is by Charles Dickens or Jane Austen because you recognise their voice. Work on your own style and you will find your own voice – it develops if you write regularly."

"There are different ways to read a book. Some of you will read analytically for style or structure, if you are thinking of writing something similar, others will read for pure relaxation. Books are wonderful companions and you are always learning from them," he says, lamenting the impatience some people have nowadays for books. At different periods of his lonely life, Bond "has found it therapeutic to write." He still carries the scars of a difficult childhood, something he says he shares with other writers like the Brontë sisters.

"Reading tastes change with time. I started with fiction, now I'm partial to biographies. I can also spend days reading the Concise Oxford Dictionary." Most successful writers have eclectic tastes.

"Sometimes a manuscript needs to be left alone for a while, so I write something else as a way to take the pressure off. I usually work on two or three pieces at the same time," says the author of some 150 novels, hundreds of short stories and thousands of articles, poems and essays in a career spanning 60 years. Even if you despair, write in your despair. Above all, never give up.

It says something for the ease with which he practices his craft that Bond insists he "the laziest writer," whose typical day would consist of a "pre-lunch siesta, then a post lunch siesta before going to bed early in the night." This twilight world of ghosts and fantasies enriches his work and keeps him going at 80. His parting advice comes from the heart: "Believe in your writing and never despair that you won't be published. Even if you despair, write in your despair. Above all, never give up."

SubQuestion No : 16

Q.16 Which of the following is not true about Bond's writing?

Ans

- ☒ 1. He found peace and solace by writing.
- ☒ 2. He writes both fiction and biographies.
- ☒ 3. He writes about ghosts and unreal things.
- ☒ 4. All his works found publishers immediately.

At different periods of his lonely life, Bond "has found it therapeutic to write." He still carries the scars of a difficult childhood, something he says he shares with other writers like the Brontë sisters.

"Reading tastes change with time. I started with fiction, now I'm partial to biographies. I can also spend days reading the Concise Oxford Dictionary." Most successful writers have eclectic tastes.

"Sometimes a manuscript needs to be left alone for a while, so I write something else as a way to take the pressure off. I usually work on two or three pieces at the same time," says the author of some 150 novels, hundreds of short stories and thousands of articles, poems and essays in a career spanning 60 years. Even if you despair, write in your despair. Above all, never give up.

It says something for the ease with which he practices his craft that Bond insists he "the laziest writer," whose typical day would consist of a "pre-lunch siesta, then a post lunch siesta

before going to bed early in the night." This twilight world of ghosts and fantasies enriches his work and keeps him going at 80. His parting advice comes from the heart: "Believe in your writing and never despair that you won't be published. Even if you despair, write in your despair. Above all, never give up."
