Question ID : 9983676563

Comprehension:

Read the passage and answer the questions given below it.

Air pollution tends to pose the biggest risk to the very old, to the very young and to people already suffering from some chronic ailments? Asthma and heart disease are two major conditions that put people at risk. Scientists are learning that air pollution can pose serious risks to anyone. You don't have to be old or sick. You don't have to suck in horrible fumes or air so full of pollutants that you can see and taste them. Indeed, emerging data show that even pollutants too small to see with the naked eye can harm healthy children and teens.

That pollution can alter how their brains function. It can make it hard for kids to concentrate. It also can throw out of whack hormones — chemical messengers that direct the body's activities. In short, it can seriously damage young minds and bodies. Lilian Calderón- is a doctor who looks at the body's tissues to diagnose disease. She looks for disease caused by pollutant particles that are small — often way too tiny to see. Scientists call these tiny specks particulates. They come from many sources. Power plants, factories, homes and cars — all spew particulates. So can forest fires.

Once inhaled, these particles can move deep into the lungs. The oxygen you breathe passes from the lungs through a thin membrane. From there it enters the blood. Many particulates are small enough to cross that membrane into the blood, too. They're known as nanoparticles. They can trigger inflammation wherever they travel. And the blood can carry them everywhere, even to the brain. Inflammation can be a good thing. The body uses it to kill off damaged cells and harmful germs. But inflammation in the brain is dangerous. It can destroy sensitive cells, causing memory problems.

Another reason to control air pollution: It can stress out the body. Imagine you're trapped in a room that's filling with smoke. Your heart is racing. You jump into action. In just seconds, you open the window and climb out the burning building to reach safety. The body's quick reaction to such an emergency is called the fight-or-flight response. Scary events, such as a fire, aren't the only things that can activate that fight-or-flight response. Air pollution can too, new data show. It does so through hormones.

Hormones are the body's chemical messengers. They control many important activities. Stress hormones help people react quickly to life-threatening situations. When we're faced with a fearful situation, the body ramps up production of certain hormones, such as adrenaline. Breathing polluted air can trigger a similar response. In an emergency, stress hormones and the fight-or-flight response can be helpful. But when the body ups their production too often or for too long, those hormones can harm the heart and blood vessels.

SubQuestion No : 11

Q.11 What are nanoparticles?

- Ans
- ☒ 1. plastic particles that pollute water and air
 - ☒ 2. small particles of any matter
 - ☒ 3. pollution particles that can enter the blood stream
 - ☒ 4. particles that promote health

Question ID : 9983676571

Comprehension:

Read the passage and answer the following questions:

In childhood I honestly believed that if I could "just be like everyone else," everything would be fine. It brought back memories of frustration with a body that never seemed to do what I wanted it to do, and feeling so desperately like I wanted to fit in but thinking I was the problem. Feeling like being able to walk was the magical cure that would solve all my problems, and that if I just had a "normal" body like my sister, everything would be perfect. Thankfully, times have changed, and I am not that little girl anymore. It took a long time, but I have learned to love my body, and I no longer see walking as the magical cure that will solve all my problems. Instead, I have learned to embrace my wheelchair as the amazing tool it is. The tool that allows me to see the world and live my life on my own terms. Slowly, I have learned I am not the problem and never have been. I have learned that cerebral palsy is not something to be battled with, overcome or conquered. It is a part of me — a complicated part for sure, but a beautiful one, and I wouldn't change it for anything. It has shaped my life and the way I view the world around me, and it's given me so many great relationships and experiences for which I will be forever grateful. I will never say I fight my disability because doing that would be fighting a war against myself,

and a very important part of me. I will never say I fight cerebral palsy because disability, and cerebral palsy, are not problems to be battled.

I will say I fight prejudice. I will say I fight lack of access, stigma and ignorance. I will say I fight discrimination. I will say I fight these things, because I do. These are battles to fight, and win. It is prejudice, lack of access, stigma, ignorance and discrimination that prevent me from having the same opportunities in life as my able-bodied brother and sister, not my cerebral palsy, my wheelchair or my inability to walk.

I will fight to make this world a better place for future generations of kids just like me. I will fight to make sure they are never told or led to believe their bodies are a problem or something they must do battle against on a daily basis just to fit in. I will fight to make sure those kids have the same opportunities as everybody else, and never believe everything would be better if they could just change who they are.

I will fight for a world where the mere presence of disability does not make you extraordinary. Where disabled children are taught to aspire to more than just existing, and where being disabled doesn't mean you have to be 10 times better than everyone else just to be good enough.

I will fight for a world where we talk about living with and owning our disabled bodies rather than overcoming them. I will fight for a better world, and a better future, because those things are worth fighting for, but I will not fight a war against myself.

Q.16 Times have changed... refers to:

- Ans  1. Her perception about herself has changed.
-  2. She has become a frustrated person now.
-  3. She has become like others.

I will fight to make sure they are never told or led to believe their bodies are a problem or something they must do battle against on a daily basis just to fit in. I will fight to make sure those kids have the same opportunities as everybody else, and never believe everything would be better if they could just change who they are.

I will fight for a world where the mere presence of disability does not make you extraordinary. Where disabled children are taught to aspire to more than just existing, and where being disabled doesn't mean you have to be 10 times better than everyone else just to be good enough.

I will fight for a world where we talk about living with and owning our disabled bodies rather than overcoming them. I will fight for a better world, and a better future, because those things are worth fighting for, but I will not fight a war against myself.

Q.19 During childhood what did the writer believe about herself?

- Ans  1. That everything would be perfect if she became like all the others.
-  2. That she would grow to be a healthy person.
-  3. She accepted her/his body as it was.
-  4. That she would never be able to be like others.

Question ID : 9983676574

Comprehension:

Read the passage and answer the following questions:

In childhood I honestly believed that if I could "just be like everyone else," everything would be fine. It brought back memories of frustration with a body that never seemed to do what I wanted it to do, and feeling so desperately like I wanted to fit in but thinking I was the problem. Feeling like being able to walk was the magical cure that would solve all my problems, and that if I just had a "normal" body like my sister, everything would be perfect. Thankfully, times have changed, and I am not that little girl anymore. It took a long time, but I have learned to love my body, and I no longer see walking as the magical cure that will solve all my problems. Instead, I have learned to embrace my wheelchair as the amazing tool it is. The tool that allows me to see the world and live my life on my own terms. Slowly, I have learned I am not the problem and never have been. I have learned that cerebral palsy is not something to be battled with, overcome or conquered. It is a part of me — a complicated part for sure, but a beautiful one, and I wouldn't change it for anything. It has shaped my life and the way I view the world around me, and it's given me so many great relationships and experiences for which I will be forever grateful.

I will never say I fight my disability because doing that would be fighting a war against myself, and a very important part of me. I will never say I fight cerebral palsy because disability, and cerebral palsy, are not problems to be battled.

I will say I fight prejudice. I will say I fight lack of access, stigma and ignorance. I will say I fight discrimination. I will say I fight these things, because I do. These are battles to fight, and win. It is prejudice, lack of access, stigma, ignorance and discrimination that prevent me from having the same opportunities in life as my able-bodied brother and sister, not my cerebral palsy, my wheelchair or my inability to walk.

I will fight to make this world a better place for future generations of kids just like me. I will fight to make sure they are never told or led to believe their bodies are a problem or something they must do battle against on a daily basis just to fit in. I will fight to make sure those kids have the same opportunities as everybody else, and never believe everything would be better if they could just change who they are.

I will fight for a world where the mere presence of disability does not make you extraordinary. Where disabled children are taught to aspire to more than just existing, and where being disabled doesn't mean you have to be 10 times better than everyone else just to be good enough.

I will fight for a world where we talk about living with and owning our disabled bodies rather than overcoming them. I will fight for a better world, and a better future, because those things are worth fighting for, but I will not fight a war against myself.

Comprehension:

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।

भारतेन्दु युग के पश्चात् द्विवेदी युग का आगमन होता है। इस काल का नाम हिन्दी के प्रवर आचार्य महावीर प्रसाद द्विवेदी के नाम पर पड़ा। हिन्दी आलोचना के क्षेत्र में द्विवेदी युग में कई महत्वपूर्ण मोड़ आए और आलोचना नदी के समान धाराओं में विभक्त होकर साहित्य के हर पृष्ठ तक पहुँचने का प्रयास करती है। आलोचना का यह प्रयास हिन्दी आलोचना के जगत को समृद्ध करता है। आलोचना की उत्तरोत्तर वृद्धि द्विवेदी युग में होती है। इसका प्रमुख कारण आलोचकों की आलोचना समझ बन जाने के कारण हुआ और दूसरा महत्वपूर्ण कारण यह रहा कि भारतीय अध्येता विश्वसाहित्य खासकर अंग्रेजी साहित्य के निकट आए और रचना प्रक्रिया की वैश्विक दृष्टि उनमें बन पायी। इधर हिन्दी में गद्य की अभिव्यक्ति क्षमता में वृद्धि हो गयी थी और हिन्दी में गंभीर विषय पर बात होने लगी थी तथा साहित्य में सुधार की प्रवृत्ति विकसित हो रही थी। जिसके नेतृत्वकर्ता आचार्य द्विवेदी जी थे। द्विवेदी युग में आलोचना की कई पद्धतियाँ विकसित हुईं जिनमें प्रमुखतः रीतिकालीन लक्षण ग्रंथों की परंपरा में काव्यांग विवेचन, तुलनात्मक मूल्यांकन, टीकाओं तथा नवीन व्यावहारिक पद्धतियों का विकास हुआ।
