Quick
Sarkari

Read the following passage and answer the questions given after it.

A tree regarded as the icon of the African savannah is dying.

International scientists have discovered that most of the oldest and largest African baobab trees have died over the past 12 years.

They suspect the demise may be linked to climate change, although they have no direct evidence of this.

The tree can grow to an enormous size, and may live hundreds if not thousands of years.

The researchers, from universities in South Africa, Romania and the US, say the loss of the trees is "an event of an unprecedented magnitude".

Revealing the findings in the journal 'Nature Plants', they say the deaths were not caused by an epidemic.

"We suspect that the demise of monumental baobabs may be associated at least in part with significant modifications of climate conditions that affect southern Africa in particular," said the team, led by Dr Adrian Patrut of Babes-Bolyai University in Romania. "However, further research is necessary to support or refute this supposition."

The researchers have been visiting ancient trees across southern Africa since 2005, using radio carbon dating to investigate their structure and age.

Unexpectedly, they found that eight of the 13 oldest and five of the six largest baobabs had either completely died or had their oldest parts collapse.

Baobab trees have many stems and trunks, often of different ages. In some cases all the stems died suddenly.

"We suspect this is associated with increased temperature and drought," Dr Patrut told BBC News. "It's shocking and very sad to see them dying."

The trees that have died or are dying are found in Zimbabwe, Namibia, South Africa, Botswana and Zambia. They are all between 1,000 and more than 2,500 years old.

Also known as "dead-rat" trees, after the shape of their fruit, baobab trees have stout, branchless trunks.

They store large quantities of water inside their trunks to endure the harsh conditions of the arid areas in which they live.

The trees also support wildlife; they are important nesting sites for birds.

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए।
 शुक्ल जी कबीर की प्रतिभा के कायल तो थे लेकिन उनके काव्य की मार्मिकता के बारे में प्रायः मौन थे। वे निर्गुण पंथ की ज्ञानाश्रयीधारा को लोक-भूमि पर स्थित नहीं मानते थे। निर्गुणपंथ का हठयोग और उनकी रहस्यात्मक अंतस्साधना, उलटबाँसी शुक्ल जी की रुचि की नहीं थी। सवर्ण-समाज से उपेक्षित और तिरस्कृत अवर्णों की विचारधारा और उनकी भावना सवर्ण विचारधारा से भिन्न होगी, इसे शुक्ल जी ने नहीं समझा। इसलिए पं० हजारीप्रसाद द्विवेदी को कबीर की जुलाहा जाति, वर्ण-व्यवस्था के प्रति उनके विद्रोह-आक्रोश को समझाने की आवश्यकता पड़ी। द्विवेदी जी ने कबीर को साहित्यिक भूमि पर नए सिरे से प्रतिष्ठित किया।
