QuickSarkari

Read the following passage carefully and answer the questions that follow.

Ocean water plays an indispensable role in supporting life. The great ocean basins hold about 300 million cubic miles of water. From this vast amount, about 80,000 cubic miles of water are sucked into the atmosphere each year by evaporation and returned by precipitation and drainage to the ocean. More than 24,000 cubic miles of rain descend annually upon the continents. This vast amount is required to replenish the lakes and streams, springs and water tables on which all flora and fauna are dependent. Thus, the hydrosphere permits organic existence.

The hydrosphere has strange characteristics because water has properties unlike those of any other liquid. One anomaly is that water upon freezing expands by about 9 per cent, whereas most liquids contract on cooling. For this reason, ice floats on water bodies instead of sinking into the bottom. If ice sank, the hydrosphere would soon be frozen solid, except for a thin layer of surface water during the summer season. Thus, all aquatic life would be destroyed and the interchange of warm and cold currents, which moderates climate, would be notably absent.

Another outstanding characteristic of water is that water has a heat capacity, which is the highest of all liquids and solids, except ammonia. This characteristic enables the oceans to absorb and store vast quantities of heat, thereby often preventing climatic extremes. In addition, water dissolves more substances than any other liquid. It is this characteristic which helps make oceans a great storehouse for minerals which have been washed down from the continents. In several areas of the world, these minerals are being commercially exploited. Solar evaporation of salt is widely practiced, potash is extracted from the Dead Sea, and magnesium is produced from seawater along the American Gulf Coast.

Sub questions

Question Number : 76 Question Id : 54592776635 Question Type : MCQ Option Shuffling : Yes
Correct Marks : 1 Wrong Marks : 0.25

The author's main purpose in this passage is to:

Options :

1. ✔ describe the properties and characteristics of water
2. ✖ illustrate the importance of conserving water
3. ✖ explain how water is used in commerce and industry
4. ✖ reveal the extent of the earth's ocean masses

Question Number : 77 Question Id : 54592776636 Question Type : MCQ Option Shuffling : Yes
Correct Marks : 1 Wrong Marks : 0.25

According to the passage, fish can survive in the ocean because:

Options :

1. ✖ they do not need oxygen
2. ✔ water expands on cooling thus preventing ocean waters from freezing
3. ✖ evaporation and condensation create a water cycle
4. ✖ there are currents in the oceans

Question Number : 78 Question Id : 54592776637 Question Type : MCQ Option Shuffling : Yes
Correct Marks : 1 Wrong Marks : 0.25

In the passage, which of the following statements has not been mentioned about the hydrosphere?

Options :

1. ✖ It is responsible for all forms of life
2. ✖ It is able to modify weather
3. ✖ It is the part of the earth covered by water
4. ✔ It is in danger of freezing over

Question Number : 79 Question Id : 54592776638 Question Type : MCQ Option Shuffling : Yes
Correct Marks : 1 Wrong Marks : 0.25

QuickSarkari.com | WhatsApp Channel | Telegram: t.me/quick_sarkari

Which of the following words can replace the word 'indispensable' in the context of the passage?

Options :

1. ✔ central
2. ✖ superfluous
3. ✖ expendable
4. ✖ redundant

Question Number : 80 Question Id : 54592776639 Question Type : MCQ Option Shuffling : Yes
Correct Marks : 1 Wrong Marks : 0.25

Which of the following words is farthest in meaning to the word ‘replenish’ in the context of the passage?

Options :

1. ✔ deplete
2. ✖ amplify
3. ✖ enhance
4. ✖ augment

Question Id : 54592776634 Question Type : COMPREHENSION Sub Question Shuffling Allowed : Yes Group Comprehension Questions : No
Question Numbers : (76 to 80)

Question Label : Comprehension
