Read the given passage and answer the questions that follow.

Outsold only by the Bible and Shakespeare, Agatha Christie is the best-selling novelist of all time. She is best known for her 66 detective novels and 14 short story collections, as well as the world's longest-running play – The Mousetrap.
Spending most of her time with imaginary friends, Agatha Clarissa Miller's unconventional childhood fostered an extraordinary imagination. Against her mother's wishes, she taught herself to read and had little or no formal education until the age of fifteen or sixteen when she was sent to a finishing school in Paris.
Agatha Christie always said that she had no ambition to be a writer although she made her debut in print at the age of eleven with a poem printed in a local London newspaper. Finding herself in bed with influenza, her mother suggested she writes down the stories she was so fond of telling. And so, a lifelong passion began. By her late teens she had had several poems published in The Poetry Review and had written a number of short stories. But it was her sister's challenge to write a detective story that would later spark what would become her illustrious career.
Agatha Christie wrote about the world she knew and saw, drawing on the military gentlemen, lords and ladies, spinsters, widows and doctors of her family's circle of friends and acquaintances. She was a natural observer and her descriptions of village politics, local rivalries and family jealousies are often painfully accurate. Mathew Prichard describes her as a "person who listened more than she talked, who saw more than she was seen."

Read the given passage and answer the questions that follow.

Everyone says you must see the pyramids! And, of course, I want to see them too! They aren't in Cairo, but in Giza, and it takes a little while to get there. Morning traffic is over, lunch time traffic hasn't yet started, so the timing is perfect. I observe the blue sky and the smog covered city. It all seems a bit yellow because of the desert dust. The air temperature doesn't drop to 35 Celsius for a single day during my stay.
We are driving past residential houses and I notice how for some of them, half the house is finished, but half isn't. Many have unfinished final floors, some, literally half the house – the side on the right is done and people live there, but the left one doesn't even have window frames! Many of the houses also have small houses on the roof – those are pigeon houses. The guide tells me that the pigeons take care of themselves during the day, looking for food, and then in the evening owner calls them and feeds them. They are mostly kept to be eaten. I tried a pigeon in Alexandria, and not planning to do that again, so just observe the tiny houses and try not to think about the fate of these pigeons.

Soon we reach the pyramids where I have to buy the more expensive, tourist ticket. Locals have to pay less. The guide also asks me if I would like to see the inside of the pyramid? It is 20 euros extra and since I am here, I might just as well! The guide snaps a few pictures of me and shows me where is the entrance to the tomb. Soon I am trying to push through the tiny tube of an entrance. An extremely narrow tunnel with low ceiling is the only way to get inside. Everything is sticky. No air. At times I have to climb very steep steps and somehow manage to let others pass by too, returning from whatever is on the other side of this claustrophobic madness.
