Read the following passage and answer the questions below.

Journaling is simply the act of thinking about your life and writing it down. That's it. Nothing more is needed. But despite its simplicity, the daily journal has played a key role in the careers of many prolific people.
As you might expect, journaling is a favorite habit of many writers. From Mark Twain to Virginia Woolf, Francis Bacon to Joan Didion, John Cheever to Vladimir Nabokov. A journal was rarely far from any of these artists. Susan Sontag once claimed that her journal was where she "created herself."
Journaling has been utilized by scores of brilliant thinkers and inventors. Charles Darwin, Marie Curie, Leonardo da Vinci,Thomas Edison, Albert Einstein. Similarly, leaders and politicians throughout history have kept journals in one form or another. People like George Washington, Winston Churchill, and Marcus Aurelius. In the sporting world, athletes like Katie Ledecky, winner of multiple gold medals, and Eliud Kipchoge, the world record holder in the marathon, rely on journals to reflect on their daily workouts and improve their training.

Why have so many of history's greatest thinkers spent time journaling? What are the benefits?
Nearly anyone can benefit from getting their thoughts out of their head and onto paper. There are more benefits to journaling than I have time to cover here, but allow me to point out a few of my favorites.
Journaling provides the opportunity to learn new lessons from old experiences. When looking back on her previous journal entries, Virginia Woolf remarked that she often "found the significance to lie where I never saw it at the time."
Reading your old journal entries is a bit like reading a great book for a second time. You pick up on new sentences and see the past in a different way. Only this time, you are re-reading the story of your life.
