Q.56

Read the following passage and answer the questions given below- In 1947, when India gained independence, a young man named Verghese Kurien arrived in Anand, Gujarat, to manage a government creamery. Though trained as a mechanical engineer, Kurien was deeply moved by the struggles of local dairy farmers, who were exploited by middlemen. What began as a temporary posting soon turned into a lifelong mission. Kurien collaborated with Tribhuvandas Patel, a local leader, and together they transformed small village cooperatives into a thriving movement—later known as Operation Flood, or more popularly, the White Revolution.

Through innovation and collective effort, the project modernized dairy production, ensuring that profits returned directly to the farmers. Under Kurien's leadership, India evolved from a milk-deficient country to the world's largest producer of milk. Beyond its economic success, the revolution symbolized self-reliance and empowerment in rural India. Kurien's unwavering belief that development must come "from the people, for the people" reshaped the nation's agricultural landscape and inspired generations to believe that sustainable change begins with local initiative and shared responsibility.

Even today, Amul, the cooperative he helped build, stands as a testament to how visionary leadership and grassroots collaboration can transform an entire economy. Kurien's story is not merely about milk; it is about dignity, innovation, and the power of collective determination.

What motivated Kurien to stay in Anand?

(1) The exploitation of dairy farmers ✓

(2) The success of the local cooperative

(3) His desire to earn a higher salary

(4) The encouragement of the government

Q.250

Read the given passage carefully and answer the following questions.
Greenland is melting, the Alps are melting and the Himalayas are melting- yet in one vast mountain region, huge glaciers have remained stable, or even gained mass, in recent decades. Can it last?
To find out, a dozen scientists, accompanied exclusively by an AFP photographer, trekked high over one glacier in eastern Tajikistan to drill for ice cores- ancient, deep samples that can shed precious light on climate change.
In September and October, they first spent four days crossing the country from west to east in four- wheel drives, then climbed on foot to over 5,800 metres altitude on the Kon- Chukurbashi ice cap, near Chinese border. Camping for a week at the summit, in freezing temperatures and despite a day- long blizzard, the scientists from Switzerland, Japan, the United States and Tajikistan drilled the glacier to extract two 105-meter- long ice cores, in sections.
These layers of ice, compacted over centuries, perhaps millennia, form an archive of climate indicators, yielding data on past snowfall, temperatures, atmosphere and dust. They must now be analysed in a laboratory to reveal their dates, said the leader of the team, Evan Miles, a glaciologist affiliated with the universities of Fribourg and Zurich.

What inference can be drawn about the stable glaciers in Tajikistan?

Q.253

Read the given passage carefully and answer the following questions.
Greenland is melting, the Alps are melting and the Himalayas are melting- yet in one vast mountain region, huge glaciers have remained stable, or even gained mass, in recent decades. Can it last?
To find out, a dozen scientists, accompanied exclusively by an AFP photographer, trekked high over one glacier in eastern Tajikistan to drill for ice cores- ancient, deep samples that can shed precious light on climate change.
In September and October, they first spent four days crossing the country from west to east in four- wheel drives, then climbed on foot to over 5,800 metres altitude on the Kon- Chukurbashi ice cap, near Chinese border. Camping for a week at the summit, in freezing temperatures and despite a day- long blizzard, the scientists from Switzerland, Japan, the United States and Tajikistan drilled the glacier to extract two 105-meter- long ice cores, in sections.
These layers of ice, compacted over centuries, perhaps millennia, form an archive of climate indicators, yielding data on past snowfall, temperatures, atmosphere and dust. They must now be analysed in a laboratory to reveal their dates, said the leader of the team, Evan Miles, a glaciologist affiliated with the universities of Fribourg and Zurich.

Q.255

Read the following passage carefully and choose the best answer to each question out of the four alternatives.

Food price inflation remains a major threat to food security, especially in low- and middle- income countries. While global food prices moderated in 2024 compared to the peaks of 2022–2023, domestic food price inflation persisted in many crisis-affected contexts, driven by currency depreciation, high import costs and disruptions to production and trade. According to the 2025 Global Report on Food Crises, economic shocks were the primary driver of acute food insecurity in 15 countries, affecting over 59 million people; nearly double the number affected in 2019, before the COVID-19 pandemic.

Despite some easing of international prices for food, fertiliser and fuel, these reductions were not always reflected in local markets. In many low-income countries, consumers continue to experience rising food costs, contributing to a cost-of-living crisis for poor households. In some contexts, such as Zimbabwe, Nigeria and Sudan, among others, staple food prices increased by over 100% year-on-year. Meanwhile, double-digit food inflation was common across much of Africa and parts of Asia and Latin America in 2024. Economic shocks have cascading effects on livelihoods and food security. High food prices and reduced incomes often force households to adopt negative coping strategies, such as reducing meal frequency and dietary diversity or selling productive assets. The impacts are particularly severe among the already vulnerable, including the urban poor and displaced populations, who often spend a large

Comprehension:

Read the following passage and answer the questions given below-
In 1947, when India gained independence, a young man named Verghese Kurien arrived in Anand, Gujarat, to manage a government creamery. Though trained as a mechanical engineer, Kurien was deeply moved by the struggles of local dairy farmers, who were exploited by middlemen. What began as a temporary posting soon turned into a lifelong mission. Kurien collaborated with Tribhuvandas Patel, a local leader, and together they transformed small village cooperatives into a thriving movement—later known as Operation Flood, or more popularly, the White Revolution.
Through innovation and collective effort, the project modernized dairy production, ensuring that profits returned directly to the farmers. Under Kurien's leadership, India evolved from a milk-deficient country to the world's largest producer of milk. Beyond its economic success, the revolution symbolized self-reliance and empowerment in rural India. Kurien's unwavering belief that development must come "from the people, for the people" reshaped the nation's agricultural landscape and inspired generations to believe that sustainable change begins with local initiative and shared responsibility.
Even today, Amul, the cooperative he helped build, stands as a testament to how visionary leadership and grassroots collaboration can transform an entire economy. Kurien's story is not merely about milk; it is about dignity, innovation, and the power of collective determination.

दिए गए गद्यांश के आधार पर पूछे गए प्रश्नों का उत्तर दीजिए।
ब्रिटिश शासन ने शिक्षा पद्धति को धर्मनिरपेक्ष बनाया। अब यह सबको सहज सुलभ थी। अपनी सीमाओं और विवृत्तियों के बावजूद यह शिक्षा पद्धति सारतः उदारवादी थी। न्याय के समक्ष व्यक्तियों की समानता, राज्य के सभी नागरिकों के लिए सामान अधिकार, मनमाफिक पेशा अख्तियार करने की आजादी, नई शिक्षा पद्धति ने इन सिद्धांतों का प्रतिपादन किया। यूरोपियन उदारवाद इसका आधार था। प्रतिनिधि संस्थाओं और एसोसिएशन और असेंबली की स्वतंत्रता जैसे विचारों का इसने प्रचार किया। ब्रिटिश शासन भारतीय जनता पर विदेशियों का शासन था और इसलिए अप्रजातांत्रिक तो था ही। फिर भी इस शासन द्वारा संगठित और चलाई गई शिक्षा पद्धति प्राक् ब्रिटिश भारत की शिक्षा पद्धति की तुलना, जिसने हिंदू समाज की जातिगत भिन्नताओं और विशेषाधिकारों को समर्थन दिया, धर्मनिरपेक्ष और मूलतः उदारवादी तो थी ही। इसके परिणामस्वरूप भारतीय समाज में नई चेतना का उदय हुआ। लोगों में स्वतंत्रता, समानता और अधिकारों के प्रति जागरूकता बढ़ी। आधुनिक शिक्षा ने तर्कशील सोच को प्रोत्साहित किया और सामाजिक कुरीतियों पर प्रश्न उठाने की क्षमता विकसित की, जिससे आगे चलकर राष्ट्रीय आंदोलन को बल मिला।

Read the given passage carefully and answer the following questions.
Greenland is melting, the Alps are melting and the Himalayas are melting- yet in one vast mountain region, huge glaciers have remained stable, or even gained mass, in recent decades. Can it last?
To find out, a dozen scientists, accompanied exclusively by an AFP photographer, trekked high over one glacier in eastern Tajikistan to drill for ice cores- ancient, deep samples that can shed precious light on climate change.
In September and October, they first spent four days crossing the country from west to east in four- wheel drives, then climbed on foot to over 5,800 metres altitude on the Kon-Chukurbashi ice cap, near Chinese border. Camping for a week at the summit, in freezing temperatures and despite a day- long blizzard, the scientists from Switzerland, Japan, the United States and Tajikistan drilled the glacier to extract two 105- meter- long ice cores, in sections.
These layers of ice, compacted over centuries, perhaps millennia, form an archive of climate indicators, yielding data on past snowfall, temperatures, atmosphere and dust. They must now be analysed in a laboratory to reveal their dates, said the leader of the team, Evan Miles, a glaciologist affiliated with the universities of Fribourg and Zurich.

SubQuestion No : 11

Q.11 What inference can be drawn about the stable glaciers in Tajikistan?

Ans

✔ 1. The stability is presented as a contrast to global melting that scientists are seeking to understand and verify.

✘ 2. The analysis of the ice cores has already confirmed that the stability will last.

✘ 3. Their stability proves that climate change is not affecting high-altitude regions.

✘ 4. The region must receive significantly more snowfall than Greenland or the Alps.

Read the following passage carefully and choose the best answer to each question out of the four alternatives.

Food price inflation remains a major threat to food security, especially in low- and middle-income countries. While global food prices moderated in 2024 compared to the peaks of 2022–2023, domestic food price inflation persisted in many crisis-affected contexts, driven by currency depreciation, high import costs and disruptions to production and trade. According to the 2025 Global Report on Food Crises, economic shocks were the primary driver of acute food insecurity in 15 countries, affecting over 59 million people; nearly double the number affected in 2019, before the COVID-19 pandemic.

Despite some easing of international prices for food, fertiliser and fuel, these reductions were not always reflected in local markets. In many low-income countries, consumers continue to experience rising food costs, contributing to a cost-of-living crisis for poor households. In some contexts, such as Zimbabwe, Nigeria and Sudan, among others, staple food prices increased by over 100% year-on-year. Meanwhile, double-digit food inflation was common across much of Africa and parts of Asia and Latin America in 2024. Economic shocks have cascading effects on livelihoods and food security. High food prices and reduced incomes often force households to adopt negative coping strategies, such as reducing meal frequency and dietary diversity or selling productive assets. The impacts are particularly severe among the already vulnerable, including the urban poor and displaced populations, who often spend a large share of their income on food. Without sustained investment in social protection, resilient food systems and macroeconomic stability, those affected can be pushed further into a spiral of degenerating acute food insecurity.

SubQuestion No : 16

Q.16 Which of the following most accurately states the main idea of the passage?

Ans

✗ 1. Global food trade improves in 2024.

✓ 4. Economic shocks intensify global food insecurity.

Comprehension:

Read the following passage carefully and choose the best answer to each question out of the four alternatives.

Food price inflation remains a major threat to food security, especially in low- and middle-income countries. While global food prices moderated in 2024 compared to the peaks of 2022–2023, domestic food price inflation persisted in many crisis-affected contexts, driven by currency depreciation, high import costs and disruptions to production and trade. According to the 2025 Global Report on Food Crises, economic shocks were the primary driver of acute food insecurity in 15 countries, affecting over 59 million people; nearly double the number affected in 2019, before the COVID-19 pandemic.

Despite some easing of international prices for food, fertiliser and fuel, these reductions were not always reflected in local markets. In many low-income countries, consumers continue to experience rising food costs, contributing to a cost-of-living crisis for poor households. In some contexts, such as Zimbabwe, Nigeria and Sudan, among others, staple food prices increased by over 100% year-on-year. Meanwhile, double-digit food inflation was common across much of Africa and parts of Asia and Latin America in 2024. Economic shocks have cascading effects on livelihoods and food security. High food prices and reduced incomes often force households to adopt negative coping strategies, such as reducing meal frequency and dietary diversity or selling productive assets. The impacts are particularly severe among the already vulnerable, including the urban poor and displaced populations, who often spend a large share of their income on food. Without sustained investment in social protection, resilient food systems and macroeconomic stability, those affected can be pushed further into a spiral of degenerating acute food insecurity.
